Value in Parentheses = Program/Saddle Cloth Number

Three-Digit Value = Past Performance Rating

SPECIAL NOTES:

Horse entries with the largest three-digit rating numbers (PPR) are considered (by this data program) to be the strongest payoff connectors.

An international shipper's past performance data, prior to its North American debut, is not incorporated with the final PPR result. *Adjust accordingly.

The 227 rating value is attached to first-time starters (with limited statlines) and international entries that have not raced in North America (US/CAN).
